For example, the words begin, start, commence, and initiate are all synonyms of one another; they are synonymous. The standard test for synonymous in only one particular sense: for example, long and extended in the context long time or extended time are synonymous, but long cannot be used in the phrase extended family. Synonyms with exactly similar meanings share a seme or denotational sememe, whereas those with inexactly similar meanings share a seme or denotational sememe, whereas those with inexactly similar meanings share a seme or denotational sememe, whereas those with inexactly similar meanings share a seme or denotational sememe. called cognitive synonyms and the latter, near-synonyms, [2] plesionyms, [3] or poecilonyms, [4] Lexicography Some lexicography Some lexicography Some lexicography, phonic qualities, connotations, ambiguous meanings, usage, and so on make them unique. Different words that are similar in meaning usually differ for a reason: feline is more formal than cat; long and extended are only synonyms are also a source of euphemisms. Metonymy can sometimes be a form of synonymy: the White House is used as a synonym of the administration in referring to the U.S. executive branch under a specific president.[5] Thus a metonym is a hyponym, polysemy, hyponymy, and hypernymy is inherent to taxonomy and ontology in the information-science senses of those terms.[6] It has applications in pedagogy and machine learning, because they rely on word-sense disambiguation.[7] Etymology The word is borrowed from Latin synōnymum, in turn borrowed from Ancient Greek synōnymon (συνώνυμον), composed of sýn (σύν 'together, similar, alike') and -ōnym- (-ωνυμ-), a form of onoma (ὄνομα 'name').[8] Sources of synonyms Synonyms are often some from the different strata making up a language. For example, in English, Norman French superstratum words and Old English substratum words continue to coexist.[9] Thus, today we have synonyms like the Norman-derived people, liberty and archer, and the Saxon-derived folk, freedom and bowman. For more examples, see the list of Germanic and Latinate equivalents in English. Loanwords are another rich source of synonyms, often from the language of the dominant culture of a region. Thus most European languages have borrowed from Latin and ancient Greek, especially for technical terms, but the native terms continue to be used in non-technical contexts. In East Asia, borrowings from Chinese in Japanese, Korean, and Vietnamese often double native terms. In Islamic cultures, Arabic and Persian are large sources of synonymous borrowings. For example, in Turkish, kara and siyah both mean 'black', the former being a native Turkish word, and the latter being a borrowing from Persian. In Ottoman Turkish, there were often three synonyms: water can be su (Turkish), âb (Persian), or mâ (Arabic): "such a triad of synonyms exists in Ottoman Turkish, there were often three synonyms exists in Ottoman for every meaning, without exception". As always with synonyms, there are nuances and shades of meaning or usage.[10] In English, similarly, we often have Latin and Greek terms synonymous with Germanic ones: thought, notion (L), idea (Gk); ring, circle (Ck). English often uses the Germanic term only as a noun, but has Latin and Greek adjectives: hand, manual (L), chiral (Gk); heat, thermal (L), caloric (Gk). Sometimes the Germanic term has become rare, or restricted to special meanings: tide, time/temporal, chronic.[11][12] Many bound morphemes in English are borrowed from Latin and Greek and are synonyms for native words or morphemes: fish, pisci- (L), ichthy- (Gk). Another source of synonyms is coinages, which may be motivated by linguistic purism. Thus the English word foreword was coined to replace the Romance preface. In Turkish, okul was coined to replace the Arabic-derived mektep and mederese, but those words continue to be used in different registers of speech or writing. Different technical fields may appropriate synonyms for specific technical meanings. Some writers avoid repeating the same word in close proximity, and prefer to use synonyms: this is called elegant variation. Many modern style guides criticize this. Examples Synonyms can be any part of speech, as long as both words belong to the same part of speech. Examples synonyms can be any part of speech, as long as both words belong to the same part of speech. adverb: quickly and speedily preposition: on and upon Synonyms are defined with respect to certain senses of words: pupil as the aperture in the iris of the eye is not synonymous with student. Similarly, he expired means the same as he died, yet my passport has expired cannot be replaced by my passport has died. A thesaurus or synonym dictionary lists similar or related words; these are often, but not always, synonyms. [14] The word poecilonym is a rare synonym of the word synonym. It is not entered in most major dictionaries and is a curiosity or piece of trivia for being an autological word because of its meta quality as a synonym of synonym. Antonyms are words with opposite or nearly opposite meanings. For example: hot \leftrightarrow cold, large \leftrightarrow small, thick \leftrightarrow thin, synonym \leftrightarrow antonym Hypernyms and hyponyms are words that refer to, respectively, a general category and a specific instance of that category. For example, vehicle is a hypernym of car, and car is a hyponym of vehicle. Homophones are words that have the same pronunciation but different meanings. For example, witch and which are homophones in most accents (because they are pronounced the same). Homographs are words that have the same pronunciation and spelling but different meanings. For example, rose (a type of flower) and rose (past tense of rise) are homonymy in Japanese Thesauri and synonym dictionaries - Reference work that lists words grouped by similarity of meaning References ^ K.4375 ^ Stanojević, Maja (2009), "Cognitive synonymy: a general overview" (PDF), Facta Universitatis, Linguistics and Literature Series, 7 (2): 193-200. ^ DiMarco, Chrysanne, and Graeme Hirst. It is important to remember that synonyms are not words that have similar meanings. This means that by learning synonyms, students learn to differentiate between shades of meaning. This enables them to be more precise. In addition, by learning antonyms, students learn the logical opposites of important words, thus enhancing their overall command of language. This worksheet outlines several strategies that will enable you to answer synonyms/antonyms questions with a higher success rate, even on questions with a higher success rate, even on questions with a higher success rate, even on questions in which you are unsure about specific word definitions. We also recommend that you use a thesaurus allows you to become familiar with the family of synonyms and antonyms associated with a given word. In terms of test taking, this can prove more valuable than knowing the precise definition of individual words. In these worksheets, students are tested on their ability to identify the antonym, or opposite, of a given word. While it helps to have knowledge of word meanings, this is not completely necessary in most cases. Rather, students can rely on their use of logic and verbal reasoning skills to answer questions with a higher success rate, even on questions in which you are unsure about specific word definitions. Rather, students can rely on their use of logic and verbal reasoning skills to answer questions correctly. Techniques for Solving Synonyms/Antonyms Questions 1) On harder synonym/antonym questions, beware of trick choices. Can you spot the trick in the following example? Choose the best antonym. RESTIVE: A) patient B) rigorous C) deceptive D) active would be the best antonym. However, this is a trick. Restive actually means restless. So, the correct answer is patient, a good antonym for restless. It is beneficial to familiarize yourself with tricky words like restive, because they are commonly tested on the SAT and GRE. 2) Take note of positively and negatively charged answer choices. It is possible to associate a negative or positive charge with almost any given word. Try to discern whether each word in the following list has a positive (+), negative (-), or neutral (=) charge. Choose the best synonym. MALIGNED: A) beneficent B) magnanimous C) downtrodden D) destitute E) elegant In the example, we are trying to find the best synonym for the word maligned. So, we should begin by ascertaining its charge. The prefix, "mal" is typically used in negatively charged words. Therefore, the answer will likely have a positive charged. (+) B) magnanimous (+) C) downtrodden (-) D) destitute (-) E) elegant (=) After labeling each, we are left with two words that are positively charged: beneficent and magnanimous. Even if you don't know the meaning of any answer choices, you have narrowed your choices down to two and are left with a 50% change of answering correctly. This is a quick technique that can be very beneficial when attempting to answer a question with several words that you are unsure about. 3) Eliminate answer choices that have no clear antonym. This technique only works on antonym questions. So, this is a great technique for use on the GRE because it only contains antonym questions. Consider the words rounded or striped. Neither of these words have a clear antonym. While almost every word has a synonym, remember that not all words have antonyms and eliminate them first. 4) Eliminate answer choices that are close synonyms within the answer shave very similar meanings, then the correct answer is too ambiguous. Therefore, it is possible to eliminate these choices. The SAT/GRE are tough tests, but they always present one answer choice from the following example. Choose the best antonym. FOMENT: A) mitigate B) engender C) check D) mollify E) satiate The words mitigate and mollify are close synonyms. The both mean "to reduce or soften in pain or intensity, to make less severe." This leaves only three remaining viable answer choices. 5) Try to associate the word with a familiar context. Words on the SAT/GRE are tested for good reason: they are very effective. This being the case, they get included in many proverbial phrases. Note the following examples: "Gail force winds," "The Village Advocate," "Test your mettle", "Road to Perdition", "Patience is a virtue", "Abject poverty", "He made it through unscathed". 6) Use your knowledge of Romance Languages. The roots of many SAT/GRE words have similar meanings in foreign languages. For example, the Spanish word malo means bad. This is a common root for many negatively charged words: maligned malignant malapropos malediction malevolent malicious malefaction In addition, the Spanish word beneficial attempt to trick the test taker by including roots in words that belie their true meaning: bellicose restive noisome credulous fulsome adulterate craven precipitate prosaic
